

Facilities Management

Our comprehensive Facilities Management program provides effective management of an owner's facilities to improve the operational efficiency of the property. Our services range from the outsourcing of specific facilities maintenance services such as roof maintenance, or boiler maintenance, to full operational control of your company's real estate assets. Our Facilities Management program is designed to meet the goals and needs of your properties while working with your in-house management teams.

Experienced Facilities Managers at our firm provides an asset based management service. Even though maintenance is an important component of Facilities Management, our outsourced facilities management services will address health and safety issues, Long Term Master Planning, annual budgeting, space planning, energy efficiency, and construction management.

M.E. McCormick Consultants has a proven track record of managing public schools and municipal properties. Put our knowledge and experience to work for your organization.

Strategic Master Planning

Master Planning provides guidance and direction to adequately care for your facilities over a long term. We spend a great deal of time with your staff gathering and analyzing data that eventually allows us to recommend a strategic, long term plan that address capital renewal, budgeting, and manageable cash flow for several years into the future.

Please allow us to come visit and show you what we can do for you!

**We manage the big
stuff so you can
manage the small stuff.**
